Biography

Versatile Software Engineering student passionate about **Frontend**, **Backend**, **QA**, and **UX/UI** design. Driven by innovation and efficiency, with a strong focus on crafting intuitive, high-performance digital experiences. Eager to embrace emerging technologies and deliver scalable, user-centric solutions.

Education

An-Najah National University B.A.in Computer Science Apprenticeship- Software specialization Expected Sep 2026
Udacity - Front End Web Developer, Nanodegree Program Jun 2025

Technical Skills

Programming Languages: C, C++, C#, Java, Python, SQL, HTML & CSS, SCSS, JavaScript, JSX, TypeScript, PHP, Selenium.

Frameworks & Libraries: Bootstrap, React.js, Angular 19, Laravel, Webpack, Vite.

Databases: MySQL, MongoDB, Firebase.

Design Tools: Figma, Canva.

Tools & Technologies: Git, GitHub.

Operating Systems: Windows.

Project Management Tools: Jira, Trello.

Cloud & Hosting: Vercel, GitHub Pages.

Soft Skills: Adaptability, Leadership, Attention to detail, Teamwork, Time management, Working under pressure.

Experience

Full Stack Intern – GRIDS APPS	Jul 2025 – Sep 2025
Currently training on building responsive web applications using HTML, CSS, SCSS, Bootstrap 5, JavaScript (ES6), Next.js, React, and Node.js.	
Intern – eMicrolearn	Jul 2025 – Sep 2025
Participated in data entry for the 9th-grade book on the iBook website, contributing to the digitalization of educational content.	
QA Intern – ASAL Technologies	Sep 2025 – Dec 2025
Manual & Automation Testing using Selenium, test case execution, and bug reporting.	

Projects

SauceDemo E2E Testing Framework [GitHub]	Jul 2025
.Built an end-to-end test automation framework for SauceDemo using Playwright, TypeScript, and POM to validate login, cart, checkout, and sorting functionalities.	
Sit Spark LLC [GitHub]	June 2025
Built a responsive static website (SiteSpark) using HTML, CSS, and Bootstrap, showcasing web design services, portfolio pages, and business landing features.	
Real Estate Management System [GitHub]	Jan 2025
.Developed a Real Estate Management desktop system using JavaFX, Scene Builder, MySQL, and Hibernate, applying design patterns (DAO, Factory, Singleton) to build secure authentication, property/offer management, and client-agent dashboards with a modern UI/UX	
Technician Hiring Platform (THP)	June 2025
We developed a full-stack web application using Angular and Laravel that connects job owners with technicians. The app includes job posting, offer submissions, and bid management to improve service quality.	
My role focused on the job owner side — creating, editing, deleting job posts, viewing offers, and accepting or rejecting bids through a smooth and secure interfaces.	
Frontend: [GitHub] – THP Frontend	
Backend: [GitHub] – THP Backend	
Time4meds App [Behance]	Nov 2024

The Time4meds app is designed with interactive UI/UX principles to enhance patient engagement and medication adherence. It offers features such as medication reminders, direct communication with healthcare providers, and access to health-related articles, all within a user-friendly interface to support effective health management.

Professional Development & Certificates

Front-End Web Developer Nanodegree – Udacity, May 2025.
